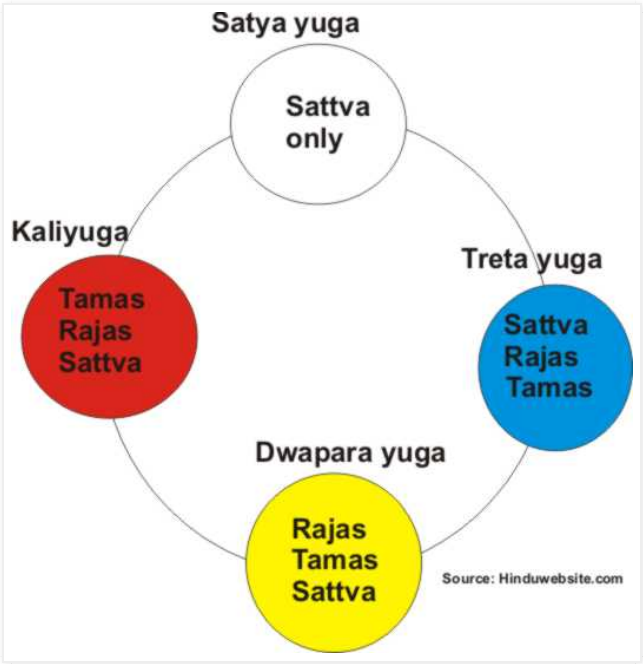
Chapter 2. YUGAS — THE TIME PERIODS



Chapter 2.

YUGAS — THE TIME PERIODS

Our Cosmos is one among the millions of Cosmoses that manifested from Brahma — the Creator. This World is unique and has its own characteristics when compared to the other Cosmoses. One of its features is dynamism or movement. There is always some form of movement here at various levels — from the Planets moving around a Star to the electrons revolving around a nucleus inside an atom. Our Cosmos exists because of this movement.

THE CONCEPT OF YUGAS

A feature of our World is the cyclic movement of Time. We can see this circular movement of time in our day-night, the days of a week, the seasons in a year etc. Time also moves in larger cycles. One such time period is called as a Yuga. It represents a particular way of life on the Earths in our Cosmos.

Yugas were introduced in our Cosmos to enhance the diversity of life and prevent monotony. Each Yuga allows a particular percentage of spiritual and material activity on any Earth. This cycle of time is present in all the Earths across all the 14 levels of our Cosmos. The duration and characteristics of these time periods varies from one Earth to another.

THE FOUR YUGAS ON OUR EARTH

Our Earth has four Yugas. Each of them comes with a distinct characteristic and set of features. This cycle of the four Yugas, also called Mahayuga, repeats continuously.

1. SATYA YUGA — GOLDEN AGE

Satya Yuga is an age of peace, harmony and perfection on our Earth. This Yuga is also known by the names: Krita Yuga (meaning 'perfect'), the New Age and the Light Age. In this phase, the highest priority is given to a righteous living based on divine principles such as truth and love. Mankind lives in total surrender and alignment with the divine will. No dilution of values is allowed in this age.

Life will be at its highest glory during this entire forthcoming duration of the Golden Age. No negativities or diseases will exist, and people would live in peace and joy, without ageing. In this period, there will be no divisions or boundaries like nation, race or class that may create barriers among men. Spiritual values like freedom, accommodation and sharing will be the norm. With everyone manifesting divinity all the time, it will be an absolute Utopia — a heaven on Earth.

Humanity will scale great Spiritual heights in this phase. Humans will be able to experience the highest with ease and also explore hitherto unknown areas in the mystical realms. They will be able to communicate with and experience God and other higher realities. With Light guiding every aspect of their lives, this age will truly be a Light Age.

Great advancements will be made in the Material fields too, but there will be no greed, selfishness or narrow-mindedness that accompanies Material success. In the previous cycle of Yugas, during Satya Yuga.

More details about this Golden Period in Humanity's History will be explained throughout this book and also in a separate chapter devoted to the Light Age.

2. TRETA YUGA — SILVER AGE

Satya Yuga is followed by Treta Yuga or the Silver Age. In this period, some dilution of values is allowed. Materialism overshadows the Spiritual values to a small extent, giving rise to negative traits in the minds of people such as greed and the urge to control.

Life in general is peaceful and prosperous; however, the concept of kingdoms gets established. This leads to a few battles among the rulers to possess lands.

The concept of currency is introduced in this age. In Treta Yuga, people use gold as their currency. For everyday purposes, Silver is the most commonly used metal, hence it is called as the Silver Age. Man is still able to experience God, but he has to make more efforts for Spiritual growth.

3. DWAPARA YUGA — BRONZE AGE

During this phase, the Spiritual laws are further relaxed as compared to Treta Yuga, accompanied by an increase in Material activities. More kingdoms get established leading to more wars and acrimony.

The Material pursuits increase in everyday life leading to more advancement in various fields. This also brings with it the negative effects of excessive materialism like individualism, urge to control others and divisions among people on the basis of caste and creed.

Silver will be the main currency while metals like brass and bronze will be used in everyday life, thus it is called the Bronze Age. The Spiritual life will be pursued by only a few people in this Age.

4. KALI YUGA — IRON AGE

The last of the Yugas called Kali Yuga is also known as the Dark Age. In this phase, Materialism overpowers everything else. There is no regard for Spiritual values. This is the age where darkness rules, bringing with it all the negative values and decay into Human life.

Men are almost always at war with each other for gaining territory and control. Greed, selfishness and other corrupt ways of living are very common in everyday life. Man loses touch with his inner light and is lead by his ego in every aspect of life.

In the midst of the chaos of this period, it will be very difficult to pursue any spiritual practices or manifest positive values. This is the phase where Spiritual masters take birth to help humanity as people will not be able to even understand the higher spiritual concepts.

This age is ruled by a personality known as Kali Purusha (Satan). Under Him, the dark forces like rakshasas, illuminati and others function with ease and keep the entire humanity in darkness. Iron is the predominant metal in this age, hence it is called the Iron Age.

DURATION OF THE YUGAS

The four Yugas occur cyclically on our Earth. Satya Yuga is followed by Treta Yuga, then Dwapara Yuga and finally Kali Yuga rules. At the end of Kali Yuga, Satya Yuga restarts and the cycle repeats. These Yugas have fixed durations. Satya Yuga exists for a period of 20,304 years, whereas Treta Yuga is for 15,228 years. Dwapara Yuga exists for 10,152 years, and Kali Yuga is the shortest with 5076 years of duration. (These durations are the successive multiples of 5076)

Nothing happens in Creation abruptly, thus a transitory period is provided between every two Yugas. Like dawn between night-day and dusk between day-night, this transitory period allows a smooth transit from one Age to another without upheavals. In these periods, the characteristics of the next age replace that of the previous one and the new spiritual values take effect.

This transitory duration is 108 years between Satya Yuga and Treta Yuga, 216 years between Treta Yuga and Dwapara Yuga, 324 years between Dwapara Yuga and Kali Yuga and the longest, that is, 432 years after Kali Yuga ends and Satya Yuga begins again.

Since Life transits from one extreme to another after Kali Yuga, more time is provided for the transition into Satya Yuga. In this duration, the values and darkness of Kali Yuga are gradually replaced with the divine life and light of Satya Yuga.
We, on this Earth are in the midst of this transitory period between Kali Yuga and Satya Yuga, at this point in time!

SOME MISCONCEPTIONS ABOUT THE END OF KALI YUGA

Hindu scriptures maintain that Kali Yuga has a duration of 4,32,000 years and that we are still in the middle of this Dark Age. This discrepancy has occurred because of misreading the timescales of different worlds. Time moves at a different pace in the Earths belonging to the 14 different levels within our Cosmos and also beyond — in the Divine planes. At the Source, time is still, or there is 'no time' in that plane.

For all the Earths in our Cosmos, Brahma Loka (the world of the Creator) is a common reference point to interact with one another. Normally, when there is a communication between Intelligent life of two Earths, the year, month, day and time of each Earth is quoted, and then the corresponding reference to Brahma Loka is mentioned. The scriptures which talk of 4,32,000 years are in fact referring to the Kali Yuga of Brahma Loka; hence the misconception came into existence that Kali Yuga on this Earth will last for lakhs of years.

Another misconception occurs in the New Age circles, where the total duration of the 4 Yugas (a MahaYuga) is mentioned as 25,920 years. This value is based on the Axial Precession of our Earth rather than the Total Time Period of the Yugas.

Our Earth's axis is not fixed. It undergoes a gradual shift of about 1 degree every 72 years resulting in a slow shift in the axis of rotation. At the end of 25,920 years, the tip of Earth's axis would have traced a circle, which is called as the 'Arc of Precession'. At present, our northern axis is pointed towards the Star, Polaris. As the axial precession shifts, other Stars like Gamma Cephei, Vega, Thuban, etc will become our North Stars. After 25,920 years, Polaris again becomes our Pole Star.

This cycle is misunderstood as a shift in Ages in the New Age circles.

LARGER CYCLES OF TIME

The Four Yugas together form a larger Cycle of time known as a MahaYuga. This runs for a total duration of 51,840 years, including the transitory periods between the Yugas.

There are cycles of time which are larger than this. 71 Mahayugas constitute a Manvantara which is equivalent to an hour in the timescale of Lord Brahma. At the end of each Manvantara, life on our Earth is totally destroyed. At the end of the previous

Manvantara, there was a great deluge. This complete destruction is also known as 'Mahapralaya'. After thousands of years, life begins again from single celled organisms. And there is also a larger time period called a Kalpa, which is equal to a day of Lord Brahma. Since its creation, our Earth is presently in the 7th Manvantara. It has completed 28 Mahayugas so far and is in the beginning of the 29th MahaYuga. We are in the transition between these two Mahayugas, moving from the Dark Age to the Light Age.

SHAMBALA — THE DIVINE CITY

As we are transiting into the Light Age, a special Divine place on Earth is opening up for humanity. This 'paradise on earth' always has the conditions of the Light Age and

hence it remained hidden, being inaccessible until now. This unique place is called as Shambala!

Shambala is a Divine city located in the Gobi desert. It exists at a higher dimension and hence was unreachable to everyone outside, as the life was still tuned to Kali Yuga. This was the reason that many explorers who tried to locate it from centuries could not find it. Shambala is also referred to as Shangri-La in the famous novel/movie — The Lost Horizon.

The people of Shambala live in peace and harmony at all times and at the heights of material and spiritual achievements.
They live in advanced physical bodies known as the Light bodies and hence do not age; they are free of disease, decay and all blemishes of the outside world. They follow all the divine Laws and live in total surrender to the will of the Supreme Intelligence.

A Special Soul from the Sun (Surya Loka), Lord Maitreya rules Shambala. Many divine personalities, spiritual masters and immortals live in this holy place. Shambala holds the repository of highly advanced material and spiritual knowledge that has been gathered across eons of time. Due to these important features and the purity of this place, it remains shut to the rest of the world during the other three Ages.

Shambala opens its doors when we pass through the present transitory period and enter the New Light Age. In fact, the entire world would become a Shambala in future. The Spiritual and Material wealth it holds will add to the glory of the Light Age on our Earth.
